

“Future of Sustainability in Production Area”

The thematic booths section dedicated
to sustainability in production

Present your innovations – at the center of your target group

Whether you plan to be present only in the thematic section or as a secondary platform in addition to your own booth at EMO Hannover 2023, you can profit from your booth package in our new Future of Sustainability in Production Area. This is where the relevant global players' decision-makers find out about new potential for energy-efficient and sustainable production plant and processes – and right at the heart: your brand and your products!

Welcome to the Future of Sustainability in Production Area at EMO Hannover 2023

As the world's leading trade fair for production technology, **EMO Hannover** reflects the latest high-impact technological and organizational changes in the sector and points the way to the future. In the **Future of Sustainability in Production Area**, international trade visitors encounter companies' ultra-modern solutions for tomorrow's sustainable production and trends in energy efficiency, the integration of renewable energies, circular economy, and lifecycle concepts.

Your benefits:

- / little planning and organizational work
- / low overall and personnel costs
- / professional support and advice from the thematic section organizer
- / exhaustive press work for the Future of Sustainability in Production Area
- / two booth sizes available
- / attractive advertising package for addressing your visitors
- / unlimited number of free admission codes for your customers
- / including media flat rate

Make an impression with your know-how at our **presentation forum**

Take this opportunity to present yourself free of charge with an example of best practice at the **Future of Sustainability in Production Area** forum.

Important: The number of presentation slots is limited, so please register in good time. Participation is free of charge (streamed contributions are billable).
